

DRYLOGIX, LLC

Pilot Conversion Agreement and Bill of Sale

Document **DLX-LEGAL-002** · Rev A · Effective August 28, 2026 · Michigan, USA

This agreement converts a 90-day DryLogix pilot into a completed purchase. Until the balance below is paid in full, DryLogix, LLC still owns the hardware. When that payment clears, title to the physical kit on this serial number transfers to the Customer. Software, firmware, dashboard, and DryLogix marks remain the property of DryLogix, LLC and are licensed, not sold.

This document is in addition to DLX-LEGAL-001 (Customer Terms and Conditions, End User License, Limited Warranty, and Product Policies). That agreement stays in force. If the two conflict on title transfer for this serial number, this conversion agreement controls.

1. The parties and this unit

Item	
Customer legal name	_____
Site / mill address	_____
Kiln class (Nyle L53 / Wood-Mizer KD150, Nyle L200S, or Nyle L200M / Wood-Mizer KD250)	_____
DryLogix serial number	_____
Pilot start / delivery date	_____
Pilot invoice or order #	_____
This conversion invoice / order #	_____

2. Consideration

Item	Amount
Purchase price	\$699.00
Pilot fee previously paid (credit)	\$299.00
Balance due	\$400.00
Payable to	Morriss Dynamix Technologies Inc., as collection agent for DryLogix, LLC

The pilot fee was a trial/use fee and not a purchase price. It is credited against the purchase price of this serial number. No separate software unlock fee is due. Payment to Morriss Lawn Service LLC or any other MDTI operating company does not constitute payment hereunder. Add-ons are due only if stated on the invoice and not previously paid.

If any payment tendered hereunder is returned, reversed, or otherwise not honored for insufficient funds or similar cause, Customer shall pay DryLogix, LLC a twenty-five dollar (\$25.00) NSF fee per such check or

transaction, in addition to the original amount due and any bank charges DryLogix actually incurs. Title shall not transfer, and no credit shall be applied, until the original amount and the NSF fee are received in good funds.

Customer is responsible for all applicable sales, use, and similar taxes on the Balance Due. DryLogix (or MDTI as collection agent) will collect tax unless Customer provides a valid exemption certificate reasonably acceptable to DryLogix before invoicing. If a certificate is missing, incomplete, or later disallowed, Customer remains liable for the tax.

3. When ownership of the hardware transfers

- Before the balance due is received: DryLogix, LLC keeps full title. Customer remains a licensed user and bailee of this serial number only.
- If the ninety (90) day pilot has already ended without conversion or return, the evaluation license has ended. Conversion under this Agreement still requires payment of the Balance Due in good funds. The Product will not operate as a licensed DryLogix system until that payment is received.
- When DryLogix (or MDTI on its behalf) has received the balance due in good funds, and this agreement is signed: title to the physical hardware in the standard kit for this serial number — and any add-on hardware already paid for — passes to Customer.
- Risk of loss on the hardware follows title, except Customer already bears loss, theft, or damage from incorrect installation as stated in DLX-LEGAL-001.
- Customer may not return the unit for the \$200 pilot refund after title has passed. The \$99 restock / shipping / refresh path applies only to an unconverted pilot.

Software, firmware, operator dashboard, documentation, and trademarks do not transfer. On conversion, the 90-day evaluation license becomes the perpetual license in DLX-LEGAL-001 Section 4.2, tied to this serial number only.

4. Product; exclusions

Customer is purchasing the DryLogix Lite monitoring kit identified above. DryLogix does not operate the kiln, replace the kiln controller, or preserve any Nyle, Wood-Mizer, or other kiln-maker warranty. Incorrect attachment is Customer's risk. DryLogix, LLC and MDTI shall have no liability for kiln damage arising from incorrect attachment, and Customer shall not be entitled to a refund if the DryLogix unit is damaged by incorrect attachment.

The operator dashboard and interface are read-only. They display kiln data and the setpoints the operator has entered on the kiln controller. Customer cannot change kiln setpoints, schedules, or outputs from the DryLogix module or dashboard.

The Product is offered for Nyle L53, Nyle L200S, and Nyle L200M, and the equivalent Wood-Mizer KD150 and KD250 class kilns, as stated on this Agreement.

The unit is already at Customer's site from the pilot. No additional outbound shipping is due on conversion. Standard outbound shipping on the original pilot shipment was prepaid by DryLogix. After title passes, the \$99 pilot-return path does not apply.

The limited one (1) year manufacturer warranty in DLX-LEGAL-001 runs from the original delivery date of this serial number and not from the date of this conversion. The warranty does not cover misuse or incorrect attachment.

5. Representations

- The Product is or will be installed in accordance with the DryLogix installation guide.
- Customer has received DLX-LEGAL-001 and agrees to remain bound by it.
- Customer elects to convert this pilot to a purchase and not to return the unit.
- Payment to MDTI as collection agent for DryLogix, LLC is valid consideration for this conversion.

TO THE MAXIMUM EXTENT PERMITTED BY LAW, LIABILITY REMAINS CAPPED AT THE AMOUNT ACTUALLY PAID FOR THIS SERIAL NUMBER, AND WE ARE NOT LIABLE FOR LOST LUMBER, DOWNTIME, KILN DAMAGE, OR VOIDED THIRD-PARTY WARRANTIES, ALL AS STATED IN DLX-LEGAL-001.

6. Execution

This Agreement may be executed in counterparts, including electronic copies. Receipt of the Balance Due in good funds completes the purchase.
